

// Day 10 of 10

Day 10

10 Career Tips for Developers

Developers make these every day.
Don't be one of them.

1/12

Mistake #01

Build in Public

Posting your work gets you noticed

```
// Bad  
// Coding alone, showing nobody  
// 'I'll share when it's perfect'  
// Waiting = invisible
```

```
// Good  
Post WIP projects on LinkedIn  
Share what you learned today  
Document your journey
```

One LinkedIn post/week = massive reach

2/12

Mistake #02

Contribute to Open Source

Best portfolio proof you can have

```
// Bad  
// 'I don't know enough yet'  
// 'My code isn't good enough'  
// Waiting forever
```

```
// Good  
git clone  
// Fix a typo in docs  
// Fix a small bug
```

Find good-first-issue on GitHub

Mistake #03

Learn System Design Early

Separates junior from senior

```
// Bad  
// Only doing LeetCode  
// Never reading architecture  
// 'I'll learn it when senior'
```

```
// Good
```

Read: Designing Data-Intensive Apps

Practice: design Twitter, URL shortener

Watch system design channels

System design = promotion material

Mistake #04

Your GitHub IS Your Resume

HRs look at GitHub before interviews

// Bad

- // Empty GitHub profile
- // No commits for months
- // All private repos

// Good

- Daily/weekly commits (green squares!)
- Good README on every project
- At least 3 solid public projects

README = your project's LinkedIn headline

Mistake #05

Network Intentionally

Most jobs are filled through referrals

// Bad

// Only applying on job portals

// Cold applying to 100 companies

// No response = give up

// Good

Comment on target company posts

Connect with engineers + send note

Attend meetups online/offline

1 referral > 100 cold applications

Mistake #06

Write About What You Learn

Teaching solidifies understanding

// Bad

// Learning silently

// No notes, no sharing

// Forget in 2 weeks

// Good

Write LinkedIn posts (like this one!)

Start a dev blog on Hashnode

Tweet a tip daily

If you can teach it, you truly know it

[linkedin.com/in/bhatishubham](https://www.linkedin.com/in/bhatishubham)

Mistake #07

Master One Stack First

T-shaped skills beat scattered knowledge

// Bad

// Learning React + Vue + Angular

// + Spring + Django + Node

// = mediocre at everything

// Good

// Go deep on ONE stack:

Java + Spring Boot → master it

Then add: React, SQL, AWS

Be excellent at 1, good at 3

Mistake #08

Prepare for Interviews Daily

Consistency beats cramming

```
// Bad
// Not preparing for months
// Cramming 2 days before interview
// Panics, fails
```

```
// Good
// 30 min daily routine:
1 LeetCode easy/medium
1 system design concept
```

30 min/day > 8 hours on Sunday

Shubham Bhati

[linkedin.com/in/bhatishubham](https://www.linkedin.com/in/bhatishubham)

Mistake #09

Soft Skills Matter Too

You work WITH people every day

```
// Bad  
// 'I'm a developer, I just code'  
// Bad communicator  
// Can't explain tech to non-tech
```

```
// Good  
Practice explaining simply  
Write clear commit messages  
Lead in standups
```

Developer who communicates well = promoted

Mistake #10

Be Consistent Not Intense

Marathon, not a sprint

// Bad

// 10 hours coding on Saturday

// Nothing for next 2 weeks

// Burnout cycle

// Good

// Sustainable pace wins:

2 hours every weekday

= 40 hours in 4 weeks

1% better every day = 37x in a year
