PROJECT SHOWCASE

How I Reduced Debugging by 30% Using AI

→ Swipe through all 6 slides

1/8

The Problem

Transformation scripts failing silently

At AlignBits LLC:

- Enterprise iPaaS platform
- Data transformation scripts
- Scripts would fail in production
- No clear error messages
- Manual debugging took HOURS
- Clients frustrated

💡 Silent failures are the worst kind of bugs

My Solution

AI-driven validation pipeline

Built using OpenAI API:

1. Script submitted for deployment
2. AI validates syntax + logic
3. Common errors auto-detected
4. Suggestions generated instantly
5. Auto-corrects known patterns
6. Only valid scripts reach production

💡 AI as a code reviewer before deployment

The Architecture

Spring Boot + OpenAI API

Spring Boot service:

- REST endpoint receives script
- Preprocessor extracts context
- OpenAI API call with prompt
- Response parsed for issues
- Decision: pass / fix / reject

All async via message queue

No blocking on AI response time

💡 Async processing = no user-facing latency

Results

Numbers after 3 months

Before AI pipeline:

- Avg debugging time: 4.2 hours
- Scripts failing in prod: 23%

After AI pipeline:

- Avg debugging time: 2.9 hours
- Scripts failing in prod: 8%
- 30% reduction in debugging effort
- 65% fewer production failures

💡 AI didn't replace engineers. It made us faster.

What I Learned

Lessons from building AI tools

1. AI output needs validation
 - Don't blindly trust AI fixes
2. Prompt engineering matters
 - Specific prompts = better results
3. Fallback to manual always
 - AI fails? Human takes over
4. Measure everything
 - Can't prove value without data

💡 AI is a tool, not a replacement

How This Helps in Interviews

This project stands out

When interviewer asks:

'Tell me about a challenging project'

You say:

'I built an AI-driven automation pipeline that reduced debugging effort by 30% across the team. Here is how I designed it ... '

- Shows initiative
- Shows AI skills (2026 trend)
- Shows measurable impact

💡 Real projects with real numbers = hired
